Gilbert Hoyle,
Auditors.

Coleman, Alberta, July 4, 1945.

Fish & Game Notes

Your Association committees are getting results. The superintendent of fisheries, Mr. H. B. Watkins, was in the district last week, and was taken around to view the different rearing pond sites. He was very enthusiastic about the whole layout, and agreed that the ponds should be located in Blainmore. It is quite possible that we will have fish in the ponds this summer, at very little expense.

Mr. Watkins thinks so much of the idea that he returned to the Pass a couple of days later, and surveyed the pond site with another gentleman. We are receiving very much appreciated assistance from the West Canadian Colonies at Blainmore. They are furnishing the machinery and a man to dig the ponds. As soon as we have permission from the CPR authorities, on whose land the ponds will be built, the work will begin. With the assistance of the other Pass clubs, it should not be hard to raise enough money to finish the job. Then we will have fish ponds that are second to none.

Hats off the Albin Panek, who did a sportsman's deed last week. Albin noticed that there were a great number of young fish in Nez Perce creek which were locked in owing to the creek drying up. He immediately began to pick the fish out of the water, dump them in a bucket and carry them to the river, where he turned them loose. We do not know just how many fish Albin saved for you and me, but don't forget that some of the fish you catch next year may have been the gift of Albin. Good work.

We will give you some good information on the different waters of the district next week. Meantime, we hope you hook such a big fish during this ideal weather that you need not have to lie when telling about it.

PICTURES REQUIRED FOR SPOTLIGHT SERIES

Since re-commencing the Spotlight series a few weeks ago some readers have asked permission to bring pictures for the series. The Journal welcomes pictures of persons in the armed services whose home town is Coleman. By all means bring in the pictures, the more the better.

THREE LITTLE GIRLS RAISED \$5.48 FOR MILK FOR BRITAIN FUND

On Friday, July 6, immediately after the close of school for the summer holidays, three little girls, Marlene and Roberta Bell and Mary Wilson, decided to mark the day with a worth while deed. They hit upon the idea of raising money for the Milk For Britain fund and solicited the aid of a number of friendly neighbors to donate various articles.

They then held a carnival in the front yard of the Bell home where they sold the donated articles. When the carnival closed the gross proceeds totalled \$5.48. This they have given to Mr. J. Allan, of Coleman Cash Grocery, who has forwarded it to the Kinsmen Club at Lethbridge.

MEAT WILL BE RATIONED

One and one third pounds of meat per person per week will be the new ration to Canadian consumers on resumption of meat rationing shortly, says prices board chairman Donald Gordon.

It is expected to take nearly two months to get the machinery for meat rationing again in order, but commercial slaughtering controls came into effect Monday, July 9. On Friday, July 13, the prices board again will introduce Canadians to meatless days in restaurants, scheduled for Tuesdays and Fridays. Housewives also will be asked to co-operate in conserving meat on those days.

Announcements forecast all meats and meat products will be covered in the new Canadian ration. Plastic tokens will be introduced to cover smaller purchases of meat, according to the ration administration.

Former meat ration in Canada of two pounds per person per week, designed to ensure equitable distribution, rather than conserve supply. Shipping lines and refrigeration facilities then limited wholesale shipments of meat overseas. Now Canada is pledged to share her abundant meat supplies with the liberated countries of hungry, war-torn Europe.

"STAIRWAY TO THE STARS"

The concrete stairway under construction from Fourth street past St. Alban's church and up the hill to Fifth street has been the subject of many complimentary remarks. Up to the present it has been a very neat piece of workmanship and Foreman Joe Malanchuk and his town workmen are to be congratulated for their good work. Possibly it will be completed within the next week or two so that all due to the west portion of Fifth, Sixth and Seventh streets may use it. Due to its steepness and length it is truly "a stairway to the stars."

MORE PRESERVES COUPONS VALID

Twelve preserves coupons, numbers P2 to P13, valid July 19, include 10 extra preserves coupons good for the purchase of five pounds of sugar for canning, as well as two regular preserves coupons valid on that date.

A total of 20 extra preserves coupons have now been declared valid by the ration administration. At the rate of half a pound of sugar per coupon, they make up the allocation of 10 pounds of sugar for canning to each Canadian ration book holder.

All preserves coupons, including the additional ones declared valid, are good for purchase of half a pound of sugar, or jam, honey, molasses, syrup or preserves from the shop shelves, the ration administration reminds.

Mr. and Mrs. J. Cousins and son Bill left at the week end for Edmonton, where Mr. Cousins will mark examination papers. They will later spend their vacation at Innes, Alberta.

Bill Gate, Dave Pow, Pop Oliva and Bill McLeod plan on leaving this week end for the west coast. They will visit Seattle and attend a few Pacific coast league ball games, following which they will travel to Fort Langley and visit Angelo Gentile.

Board Of Public Utility Commissioners Recommended 2 Cents Boost Per Quart In Milk Price Enquiry

In the Matter of The Public Utilities Act; and in the Matter of an Application by Pass Dairy Limited for an Increase in the Price of Milk.

This is an application to the Board of Public Utility Commissioners by Pass Dairy Limited, a milk distributor in the Crows' Nest Pass controlled area, and the application was supported by the two producers who ship to that plant and by one producer-distributor. The application was heard in Blainmore on the 30th day of May, 1945, after publication in The Coleman Journal and Blainmore Enterprise on the 17th and 24th days of May.

It should be stated at the outset in general terms that the Crows' Nest Pass controlled area is situated in the eastern part of the Rocky Mountains towards the southern part of the province. There is a main hard-surface road through the Pass, but otherwise the roads are rough and extremely steep, making the delivery of milk difficult. The surrounding country is not adapted for general farming purposes, with the result that comparatively little feed can be grown in the area and the pasture generally is not of good quality and limited in amount. The Crows' Nest Pass is a mining area and in many respects is comparable to Cadomin, Mountain Park and the Nordegg areas.

Evidence was given by officials of the Pass Dairy and it is perfectly obvious that unless some relief is given to this distributor, it is faced with inevitable bankruptcy. The company purchased its business from Fabbri Brothers in April, 1943. This business has changed hands three times in three years and does not appear to have been successful for the very reasons which are the cause of the present application. Evidence was adduced at the hearing disclosing the result of the company's operations from the date of its acquisition of the plant until 30th April, 1945. For the period 19th April to 31st December, 1943, the surplus of revenue over expenditures, after depreciation, amounted to \$273.35, and current liabilities, as at 31st December, 1943, amounted to \$1,200.06. The surplus above mentioned does not include the salaries of the plant manager or the business manager; the net result is a substantial deficit for the period mentioned.

For the year 1944, receipts exceeded expenditures (including depreciation) by the sum of \$1,953.59. Current liabilities at the end of the year, however, amounted to \$693.40 and since the surplus did not include wages for the plant manager or the business manager, there was a deficit for the year. The same is true for the period from 1st January, 1945, to 30th April, 1945, and a substantial deficit is shown for that period.

The capital investment of this company is \$17,687.00. The capacity of the plant is approximately 2,000 quarts per day, but the highest output during the period mentioned was 1,715 quarts and at the present time the wagons leave the plant with approximately 1,260 quarts per day.

The controlled area is approximately seventeen miles long, but the inhabited portion is not more than two miles wide, so that expenses for gasoline and trucks form a considerable item of expense. Labor difficulties have contributed in substantial measure to the situation in which the applicant finds itself. Work in the mines is plentiful and pay appears to be attractive. In addition miners are unable to leave that occupation, with the result that the applicant is unable to secure sufficient labor for its needs, resulting in employees working for seven days per week and long hours per day, involving the payment of very substantial amounts of overtime.

The principal contributing factor, however, is the fact that there is not sufficient milk produced in the area to serve its needs. The evidence establishes that for the 1943 period 8.6 per cent of the milk sold

in the Crows' Nest Pass was brought in from the City of Lethbridge and the corresponding figures for 1944 and 1945 are 13 per cent and 14.9 per cent respectively. For the period August, 1944, to 30th April, 1945—the Fall and Winter—the percentage was 16.4 per cent.

The price of Lethbridge milk, f.o.b. the plant, is \$3.75 per 100 pounds, or \$1.12 per 100 pounds more than is paid to producers in the area. The volume of sales has increased materially since 1943, but in this case volume means greater disaster to the operator because the additional supplies must be secured from Lethbridge at the price above mentioned.

There is a substantial population and while the exact figures are not known, it was stated in evidence that 8,140 ration books had been issued in the Crows' Nest Pass.

The absurdity of the labor situation can be illustrated by the fact that the plant manager, who is supposed to receive \$125.00 per month, is the lowest paid man in the whole establishment, a situation which arises through the payment of overtime.

It was established that the average cost of milk to the plant was 7.4 cents per quart, excluding Lethbridge milk, and that the cost of processing, delivering and administration amounted to 4.53 cents per quart, or a total of 11.93 cents. The average amount received per quart, including the consumer subsidy, is 11.85 cents, resulting in a net loss of .11 cents per quart.

If the Lethbridge milk alone is considered, the cost of the milk alone amounts to 9.37 cents per quart, and adding to that amount the cost of processing, etc., 4.53 cents, the total cost of the Lethbridge milk is 13.90 cents per quart. The average price received is 11.85 cents, resulting in a loss on the Lethbridge milk of 2.05 cents per quart.

It can be stated that, pursuant to its powers, the Board conducted a private investigation through the medium of an independent Chartered Accountant, and the results shown by his report amply corroborate the evidence given at the hearing.

Mr. Ray Bagley, a producer-distributor operating at the west side of the area, distributes milk to the employees at the power plant and lime works at Sentinel, a point isolated from the rest of the area. He produced a statement of his receipts and expenditures, showing that the cost of feed alone amounted to \$4.00 per day and that his receipts from the milk amounted to \$4.05 per day. His business is very small, but he obviously is operating at a loss and is not prepared to attempt to increase production unless some price adjustment is made.

Evidence was also given by Wm. Oliver, a shipper to the plant, who has an investment in buildings, equipment, trucks and herd of \$22,400.00. For the period from 15th May, 1944, to 15th May, 1945, his receipts from the sale of milk amounted to \$16,940.88, and of this amount nearly \$1,940.00 represents feed. His cash surplus for the period amounted to \$501.44, and if depreciation is taken into consideration, he is operating at a loss of approximately 12 cents per 100 pounds. The expenses are no provision whatever for wages for the operator or his sons or his daughter, all of whom work on the farm. His operations are limited to dairying.

Evidence was also given by Pete De Groot, who has an investment in land, buildings, machinery, trucks and cattle of \$11,050.00. His receipts from the sale of milk for the period May, 1944, to May, 1945, amounted to \$5,000.54. His expenditures amounted to \$3,559.62, of which amount \$2,000.00 is claimed feed. After allowing for depreciation this operator would show a net profit of \$983.42, out of which provisions must be made for wages for himself and family.

(Continued on Page 5)

TOWN WORK GANG FILLING POT HOLES

On Wednesday morning the town work gang was busy filling in pot holes in the hard-surface with asphalt. The corner at the tennis courts was, in bad shape due to fairly deep holes and this condition has now been corrected.

Serviceman's Corner

By J. O. S.

For the past few months the public have been deluged with thousands of words on the subject of how to treat the returned men and women when they return to their homes from the battlefields of the world. One can scarcely pick up a newspaper or magazine, or turn on the radio without reading or hearing someone discussing this problem. A large part of this has been very instructive, but unfortunately some of it has not served a useful purpose. We must remember that our comrades have had an opportunity to observe and be associated with peoples of other countries. They will return richer in knowledge, and a wider divergence of experience. Many of them older and wiser and fully aware that they will find many difficulties in their path when reinstalling themselves in civilian life.

These men and women left the security of their homes and gave willingly of time, energy, and of life itself. What for? Not for a change, or a desire for adventure, but to protect and preserve our way of life and freedom, which so many of us are inclined to take for granted. In return they do not wish to be set apart, looked upon with scorn, or placed upon a pedestal. They realize that life is a serious business and not a bed of roses. Their greatest desire is to return to civilian life and take up their proper place in society.

A grateful country owes them a great deal, but above all else the opportunity to make a decent and honorable living, free from social and economic strife. To attain this ideal, it depends upon every one of us to fulfill to the fullest extent our responsibilities as citizens of a free, young and healthy nation whose boundaries stretch from the Atlantic to the Pacific, and whose sons and daughters are known the world over for courage, valor and love of freedom. This should be and will be our goal, if we apply ourselves unflinchingly to the task which lies ahead. The experience of the past and the necessities of the future should be our rule and guide.

The prime object of our men and women when being released from the services is to get away from it as quickly as possible. The result is that a great deal of the information that is given to them does not register at the time. Consequently a great many questions are left unanswered. These problems arise after a few weeks and cause loss of valuable time and money. With the duplication of services that we have today, one can spend days trying to find the proper branch of administration, and then often find it difficult to get a definite answer.

The Canadian Legion is fully aware of this problem and are continuing taking steps to alleviate this most distressing problem. I cannot at this time give you any definite information with regard to this, but if you will keep in close touch with the columns of this newspaper, any steps which we take for your benefit will be fully explained.

My only advice at this time is, if you require information, contact the Department of Veterans Affairs which is located in the Hudson's Bay Building in Calgary. Make certain that you have all the required information, that is necessary, so that you will save yourself time and money, when you go to see them personally.

Again I invite you to contact either J. O. Starratt, Nanton, Alberta, your representative, or J. Harper Prowse, M.L.A., Edmonton, and present your problems to us, that we may discuss them in the columns of the newspapers or direct you to the proper authority. We feel that the problems that are affecting you are also affecting others. So for the benefit of our common cause, get behind us that we may be able to serve you to the best advantage.

Hold on to Your Victory Bonds

Municipal Hospital Debenture Issue Postponed

Due to unforeseen circumstances arising during the past week, the Crows' Nest Pass Municipal Hospital Board has postponed the sale of the \$185,000 debenture issue that was scheduled for the three weeks period July 16 to August 6.

It is quite probable that an official statement will be issued shortly.

UNEMPLOYMENT INSURANCE

Four years ago on July 1, Canadian workers began paying contributions into a fund to protect them against the hazards of unemployment.

Fred J. White, regional superintendent, Unemployment Insurance Commission, Winnipeg, in a fourth anniversary message to all members of the prairie region staff this week, stressed the importance of an attitude of friendliness and a display of personal interest in the problems of those visiting employment and selective service offices.

In regard to the future, Mr. White said, We are now looking forward to a continuance of a period of heavy responsibility, not only in seeing the war through to a finality, but in fitting fellow workers who will be released from the various armed services into useful and suitable employment, re-establishing those who were placed temporarily in war industrial employment as well as the opportunity of displaying initiative for those suffering serious disabilities.

The present Unemployment Insurance Act was enacted and given Royal Assent on August 7, 1940. This was the first piece of social legislation enacted in Canada and administered by the Dominion government. Since that time, it has made rapid and progressive strides. Today, the Unemployment Insurance Commission has five regional offices and 250 local offices, with staffs of over 4,500 persons. In the prairie region, which extends from the Lakehead to the British Columbia border, in addition to the regional office, there are 30 local offices, 2 district offices and 12 audit offices, with over 1,100 employees.

300 Attended Elks' Picnic Sunday

Last Sunday Coleman Elks' lodge held its annual picnic with 300 members, families and friends present. The site was at the Boy Scout camp on the Knowles' ranch.

Tribute was showered on Sonny Richards, Bert Bond and their able assistants for the manner in which the program was run off and for a delightful supper.

Races were held for the children and women, while the men played horseshoes and softball. Each child was given pop and oranges. Dancing was enjoyed to the music of Ernest Belik's accordion. The Weather Man was on pretty good behaviour and all report a most excellent picnic.

Miss Rita Ash accompanied Miss Winnifred Dunlop to the Kootenays where the two young ladies will vacation for two weeks.

Mrs. Fredlund, RN, of the local hospital staff left on Wednesday for the Cranbrook district, where she will spend her vacation.

Mr. A. H. Goodman, of Vulcan, will shortly arrive at the local CPR depot to replace Lloyd Fletcher, who plans on retiring from the CPR service.

Patsy Perry, former driver for Hunter's Bakery here, has returned to Fernie after service overseas. He has now entered the employ of one of the Fernie hotels.

Mr. and Mrs. Charles Graham, of Fernie, passed through here on Sunday enroute to the Calgary Stampede. Mrs. Wm. Milley accompanied them from Coleman.

R. Parry has been appointed temporary Canadian Legion secretary until the end of the term six months hence. He succeeds the late Harold Houghton to the position.

WORLD HAPPENINGS
BRIEFLY TOLD

Norway's new premier, Einar Gerhardsen, said that parliamentary elections will take place Oct. 8.

Admiralty announced that 263 British, Dominion and Allied minesweepers were sunk during the war, and 74 seriously damaged.

Canadian Red Cross juniors have contributed approximately \$250,000 to purchase food and clothing for children in war torn countries.

Maj.-Gen. Sir Harry Davis Watson, younger son of Gen. Sir John Watson, V.C., and an extra equerry to the King, has died at the age of 78.

President Truman has come out flatly in favor of the post-war completion of the Alaska Highway in co-operation with British Columbia and Canada.

British demolition squads are blowing up the Siegfried Line. The job of removing concrete pillboxes and dragons' teeth will require several years, officials predicted.

Yorkshire land owners have been invited to make gifts of oak trees from their estates for the restoration of the blitzed Gullihall. The wood will take five years to mature.

Three high ranking Chinese officials were executed for their part in the handling of military supplies for use in the continental counter-offensive against Japan.

A number of Thames fireboats of the National Fire Service which fought dock fires during the London blitz are being handed over to the army fire service for use in harbors and rivers of liberated countries.

May Be Banished

Dutch Military Officials Have Idea For Punishing Traitors

Deportation of several thousand quislings to Dutch Guinea, South America, is under consideration by the Netherlands military administration as one solution of what to do with Holland's 100,000 war criminals, collaborators and Nazi sympathizers.

Cautiously preparing the framework for punishing traitors and quislings, Dutch military officials are giving much thought to the idea of enforced colonization.

They realize that it is obviously impossible to shoot all the out-and-out traitors, numbering perhaps 20,000. The idea of transporting Dutchmen and their families to fetid, swampy jungle-lands emphasizes the problem of purifying war guilt without allowing the spirit of revenge to turn into a bloodbath.

WOULD CHANGE PLACES

It was very obvious that the new recruit was a raw hand at boxing as he entered the ring, and when he saw his hefty opponent he became more nervous still.

"Who are you?" he asked. "I'm your second," was the reply. A look of relief lightened the recruit's face as he said:

"No, you go first. I'll go second!"

WANT TO GO BACK

The Victoria Daily Colonist in a special dispatch from Ottawa quoted Arthur MacNamara, director of selective service, as saying that a "very considerable" number of Japanese in Canada have asked to be returned to Japan at the conclusion of the Pacific war.

LIFE'S LIKE THAT

By Fred Neher

"Poor guy... They say nobody ever called for him."

On The Double

Construction Group Built All-Weather

Airfield In Record Time

When Field-Marshal Montgomery chose the date for the Rhine crossing it was expected that the most forward airfield of Air Vice-marshal Hudleston's No. 84 fighter group of Second T.A.F. would still be under construction. Thirty days had been reckoned as the time needed to complete the work, but 1,000 airfield construction group men—men of the Royal Engineers and the Pioneer Corps—cut down the time by ten days, and the airfield was ready 20 days after the first tree had been uprooted. It is not a mere landing strip of the type that airfield construction groups built in Normandy in a couple of days or so, but a complete, all-weather airfield. Here are some of the things the 1,000 men did in 20 days: Removed 21,800 trees; cutting down 19,000 of them by hand and uprooting 2,800 by bulldozers; knocked down eight houses; laid down 4,000 tons of steel planking to build the 1,500 yards long and 40 yards wide runway, the taxiing strips and the dispersal points; and excavated 150,000 yards of earth and replaced it with 100,000 yards of sand.

Dickens Fellowship

Members Protest At Rumor That

Famous Author's House Will

Be Pulled Down

Dickens Fellowship members in London are filled with dismay at the news that Dickens' home at one time—No. 1 Devonshire Terrace, Marylebone—is soon to be pulled down. A characteristic protest appears in the newspapers.

"The war," says one Dickens' lover, "has caused the loss of many historic buildings in London and elsewhere. Surely it is up to us to preserve those that are left. The house in which those immortal works as David Copperfield and The Old Curiosity Shop were written must be of great sentimental value to all lovers of the works of Dickens. It is surprising that none of the Dickens societies has tried to save this house for posterity."

GUARDED LOUIS REIL

Alfred Smith, 84, who acted as a guard for Louis Riel before the latter's execution in Regina in 1885, is dead. A native of London, England, he served in western Canada with the then Royal North West Mounted Police. It was during this term of service that he guarded the leader of the Northwest rebellion.

Alaska was once called Russian America.

SUMMER "GREMLINS" CAN RUIN HOLIDAY

In a warning to summer vacationists, the Health League of Canada advises there are many common summer hazards, which could be termed "Summer Gremlins," and which too often are forgotten or overlooked.

The League's Industrial Division, in one of its payroll pamphlet inserts, admonishes:

"Enjoy yourself this summer. But watch what you're about. The 'Gremlins' sure will get you if you don't watch out!"

Stating that vacation-time should be a period of relaxation, recuperation, and rest, the League advises vacationists to take it easy—enjoy the warm days but watch out for "Summer Gremlins," a name that could be applied to the common hazards that all too frequently rob them of needed pleasure and change.

For instance, sunshine, taken in proper doses, improves your health. Sun baths should be brief at first—just 10 minutes the first day, 15 the second and so on. Remember, it takes 16 days to safely sun-tan a child. Burns should be treated like burns from any other source.

Steer clear of the plant with three shiny dark green leaves—poison ivy. Those who become exposed should bathe their bodies with soap suds twice and repeat. This washes away the oil, forestalling or minimizing irritation. Soothing, protective lotions and hot compresses are standard treatment.

Chances should not be taken with impure water or with unpasteurized milk. Impure water should be brought to a boil before it is used or it can be purified by chlorination.

Milk can be pasteurized by the following home method advocated by Miss Margaret Smith, Health League Nutritionist:

First, the home pasteurizer should obtain a heavy aluminum container, with faucet attached about two inches from the bottom. Also needed is a removable metal rack, which should clear the bottom of the container by about 1½ inches. The container should be deeper than quart bottles which can be used to hold the milk. An armoured thermometer also is needed.

The filled bottles of milk, with the

THIS CURIOUS WORLD

WHOOPIING COUGH

MAY OCCUR BETWEEN THE AGES OF ONE DAY AND EIGHTY YEARS.

ANSWER: Right. Monkeys, like other mammals, have two sets of teeth... the temporary milk teeth, and the so-called permanent set which replaces them.

REG'LAR FELLERS—A Real Sport

IN HEART CRASH—Mrs. Eleanor Henderson of Toronto, member of a circus troop on the way from Ottawa to Carman, Man. She was one of the five killed when a truck and car collided on the trans-Canada highway near Hearst, Ont. Four of the victims were in the circus troop.

Signing Of The Charter

The World's Best Hope For The Future

The charter which the delegates of the United Nations signed at San Francisco on Tuesday (June 26th) is the world's best hope for the future. Though it may not satisfy some perfectionists, it does provide really workable machinery which is, used, will prevent another world war.

As President Truman said in his address to the Conference, the world must now use it. "If we fail to use it, we shall betray all those who have died in order that we might meet here in freedom and safety to create it."

Milton sometimes had more than 300 words to a sentence in his writings.

thermometer inserted through the cap of one bottle, are placed on the rack in the container, in cold water about 1 inch from their tops. Heat is applied and when the thermometer reaches 143 degrees F., the heat is reduced so that the reading remains between 142 degrees F. and 145 degrees F. for 30 minutes. All virulent disease germs will then have been killed.

If ice is available, the water should be drawn off, a little at a time, and the ice added, until the reading is 45 degrees F.

OUR COMPLETE SHORT STORY—

TRAGEDY

— By —

MARCIA DAUGHTREY

McClure Newspaper Syndicate

Mona Montana ("the girl with the most beautiful teeth in the world") swept past the two silent women waiting in the reception room, and entered the dressing room in the doctor's suite. She was hitting her under lip nervously as she hung up her mink coat and ran a comb carefully through her magnificent black hair. "The doctor will see you now," the nurse said, leading the way to the dental room. It was pleasant in a sterile way, with its pastel green walls, its trim shining instrument cabinet, and its white-calfskin upholstered dental chair, but the actress shuddered.

"Medieval torture chamber," she said in her beautiful infected tones. "And I'll have none of your abuse."

Dr. Higgins chuckled as he adjusted the headrest. "Dentists were perfecting techniques when your ancestors were in the theatre jerking wooden puppets around, my lady."

"If you hadn't slept for three nights, you might not be in such jovial humor."

"It's your own fault. You'll get no sympathy from me." From a drawer, he secured a dental mirror and an explorer. "Same old trouble, huh?"

Something very like terror clouded Mona's eyes as she studied the doctor's face. He was intent on her mouth, moving the explorer around and lifting his eyebrows when she winced and uttered a short moan.

"Tender, huh. Well, come into the X-ray room and we'll snap a couple of pictures. Miss Anson, did you get Mona's autograph?" Whoever she goes, she expected to sign a few books and we mustn't interrupt the routine.

"You aren't feeding me with your merry beside manner. I know you're getting ready to give me bad news." Mona accused, minute drops of moisture forming on her upper lip. It was that accursed automobile accident, she thought. That front tooth had never been healthy since she had tried to break the windshield with it. During her last picture, the tooth had shown enough discoloration during make-up tests to need whitening each day.

With her thumb, she held the small white oblong X-ray film in place. The machine clicked. "Just compose yourself for five minutes," the doctor ordered, withdrawing into the dark room.

Five minutes. Five short minutes to reach a lifetime verdict. The motion picture camera was so critical; it sought out things the normal eye forgot. And the technician camera was even worse. Any little blemish in her appearance, any malformation of that perfect dental smile. . . . Mona refused to think of it.

Instead, she became aware of two

small boys peering around the door at her. Their eyes were round with wonder, and their faces glowed with curiosity. "Hello," she said experimentally. They slid into the room. "What is your name?" she said to the older boy about five. He giggled and stepped all over himself. To the little one, a dimpled pixie of three, she said, "Don't you know your name?"

The sentence appeared to entrance him. "Don't you know your name?" he repeated, mimicking her inflections and the older boy took up the refrain.

"My name is Mona," the actress broke in, and they caught up that statement and made an anthem of it. The nurse arrived in a flurry of apologies. "I'm sorry if they bothered you. You see they are so hungry to talk to strange people to anyone who will listen. Their mother is waiting out in the reception room. You may have noticed her—she's deaf and dumb."

"How unfortunate!" Mona murmured conventionally. She thought, What pretty children! Then they dwindled from her mind. Suppose she should lose that tooth! A restoration might not be perfect. . . .

Dr. Higgins emerged from the darkroom, X-ray film in his hand. "Mona, that tooth will have to come out."

Mona Montana fainted and slipped quietly to the floor.

She came out of the fog slowly, numbingly. "My future. . . my career. . . ." Softly she began to cry.

"Pull yourself together," the dentist ordered. "Sit out in the reception room and plan for a husband and a home and some children. A tooth more or less won't har you from those distinctions."

Mona sank into one of the high chairs and instantly the two boys swarmed over her. "Talk to us," they commanded. "Say things. Tell a story. Make a noise like a cow and a horse." Their mother loomed forward, her eyes enormous with concentration.

Mona told the youngsters about the three little pigs and Snow White. Her mind, swinging at a tangent, said, This is catastrophe. Why does this horrible thing have to happen to me? My teeth are so lovely. . . .

The woman across the room scribbled on a piece of paper and handed the note to Mona who took it with a ruffle of annoyance. She read it once, twice. Slowly her eyes filled. What a beast I've been! she thought. What a sniveling coward!

Tremulously she read the words again. From her purse she pulled a pad and a pen and began furiously to write.

The sentence the mute mother had written was: "Please write down all the little words my baby says."

Prefabrication Not New
Prefabricated Buildings Were Known As Far Back As 1481
Everybody knows that "prefabricated" houses of various kinds will become temporary homes for thousands when the war ends. Few people, however, know that prefabricated buildings were known as far back as 1481.

In that year King John of Portugal began the practice of sending out trading ships equipped with special prefabricated forts as protection against the native with whom they dealt. One of these forts, rebuilt and modernized, is actually still in use today at Elmina Castle, in the Gold Coast.

A COUNTRY EDITOR LOOKS AT OUR CANADA
BY JIM GREENBLAT

• Pot-pourri around the country: At Shawinigan Falls, Que., the infant son of Mr. and Mrs. Jas. Lahaie fell from a second floor balcony, 30 feet, suffered only fright, no injuries. C. L. McLaughlin, near Killybeg in Grey County, Ontario, has a faithful old horse aged 30 years used for ploughing last fall suffered its first illness in the winter. At the basic training centre Maple Creek, Sask., is a full platoon of Canadian soldiers, mostly Canadian born, getting ready for action in the Pacific. . . . Ted Hawley of Progress district, B.C., got an order for 500 weanling pigs for points in the Yukon and Alaska with tentative prospect of up to 3,000 each spring for the next several years.

• Apples are big business and statistics prove that. Annapolis Valley apple growers had a net return from the 1944 crop of \$4,871.87, or an increase of \$59,945 over the preceding year. The commercial crop totalled 1,733,901 barrels and this, while considerably below the originally estimated 2,000,000 barrel crop, was an improvement of 137,000 barrels over the previous year.

• In onion there is strength. Over a mile of onions. That is the record of Archie Bink at Neepawa, Man. every year. Raising onions as a hobby he plants from 150 to 200 pounds of sets every year, having between thirty and forty rows 200 feet long. Specializing in growing and saving his seed, Archie has already sold 600 lbs this year and has another 500 lbs. left. At one time he harvested over 2,000 pounds of onions and never had one for himself.

• If all the farmers in forest areas took the same interest in reforestation as Ed Chappell of the 12th concession of Saugeen, Ont., this country would be a model for all others to follow. He started tree planting on his farm 22 years ago, and since 1933 has planted 37,000 trees. Besides tree being good business, he loves trees. In the past seven years he has put out jack pine, red pine, white pine, walnut, cedars, spruce, soft maple and elm. Ed doesn't holler at the state to do anything but does something himself.

• The editor of the King's County Record, Sussex, N.B., gives us the benefit of some fine research. Since 1874, of the 18 Dominion elections, four have come on Mondays, six on Tuesdays, five on Thursdays, two on Wednesdays. Elections held before 1874 took more than a day to complete, the first in 1867 taking more than six weeks for polling. The first one-day election was Thursday, Jan. 22, 1874.

• Here's something with an objective, the school for adults in the

THEY NEVER FAIL TO PLEASE—You don't have to live down below the border to take to these fluffy Down South Biscuits. Smothered with creamed ham, and served with garden-fresh snap beans, and a salad of cucumber slices and tomato cubes they're the perfect setting for a not too heavy yet satisfying summer time dinner.

DOWN-SOUTH BISCUITS
1 1/2 cup flour
1 teaspoon baking powder
1/2 teaspoon soda
Sift together flour, baking powder and salt. Roll all bran into fine crumbs and add to flour. Add cream and stir until dough is formed. Turn onto floured board and roll to 1/2 inch in thickness. Cut with small biscuit cutter and bake on greased baking sheet in hot oven (470 degrees F.) about 10 minutes. Yield: 16 biscuits 2 1/4 inch diameter.

Note: If biscuits are brushed with a mixture of egg yolk and water before placing in the oven, they will have a golden brown glaze.

CREAMED HAM (Serves 8)
6 tablespoons butter or margarine
8 tablespoons flour
3/4 teaspoon salt
1/2 teaspoon pepper
Melt butter or margarine in the top of a double boiler over direct heat. Stir in the flour, salt and pepper. Remove from heat and add the milk slowly, stirring until well blended. Cook in double boiler until sauce thickens. Add ham and Worcestershire sauce and heat. Serve on Down-South biscuits.

News For Gardeners

New Variety Of Lettuce Developed In United States

Lettuce is always an intriguing subject. The city man thinks, when he hears the word, that some sophisticated person is referring to "folding money." The farmer is simply interested in fact of lettuce. He will be particularly interested to learn through the United States Department of Agriculture, that there is a new lettuce variety. There is smartness, even sophistication here, too. According to Science News, old-style lettuce goes to seed and this process in lettuce is known as "bolting." The fine point about the new style lettuce is that it is reluctant to "bolt"; it is slow to "bolt", and therefore is called "Slobolt" lettuce. This name of "Slobolt" is near enough to please any dealer in words.

The new lettuce, say the experts, does not shoot up a flowering stalk and "go to seed" as soon as summer comes. It was developed by Dr. Ross C. Thompson at the Government plant industry station at Beltsville, Md., a short distance outside Washington. "It has frilled light green leaves with the very wrinkled surface known to horticulturalists as "savoyed."

It appears that propagation stocks of seed are now being distributed to U.S. growers. The expectation is that there will be enough seed for general planting by spring of 1946. Only time of course can tell whether or not "Slobolt" will be what is known in the trade as a "fast seller."

—Woodstock Sentinel Review.

Had A Fortune

How The Editor Of A Country Newspaper Got Ahead In The World

The editor of a country newspaper retired with a fortune. When asked the secret of his success, he replied: "I attribute my ability to retire with a \$100,000 bank balance, after 30 years in the country newspaper field, to close application to duty, pursuing a policy of strict honesty, always practising rigorous rules of economy, and to the recent death of my uncle, who left me \$98,500."

Western Retailer.

woodlands of Quebec, known as "School of Community Programs." Running four years now, it has attracted attention all over the continent. The school this year will be held next August on the western shores of Lake Manamoussaguet, a few miles from the U.S. boundary in a section of Canada where English and French Canadians have lived together since Confederation. It stands as a symbol of Canadianism. Americans join in the deliberations, farm people mix with representatives of industry and labor, and problems and their solution are tackled on a common front. The community, province and nation is the key thought in discussions, not class, creed or group.

• A new \$30,000 fruit packing and cold storage plant is being built at Yarrow, out Vancouver way, the manager for the growers estimating they will pack upwards of 12,000 tons of berries this year.

Bridge-Laying Tanks

Saved Many Allied Lives In Invasion Of Europe

One of the secret weapons that saved untold Allied lives in the invasion of Europe were the bridge-laying tanks. By using them the Allies were enabled to lay bridges across ditches and craters up to thirty feet wide without a single man leaving his own tank or being exposed to enemy fire. In Normandy assault bridgelayers tanks were used to surmount seafort and anti-tank walls.

The bridges consist of two main types; first, those used by the Royal Armoured Corps for surmounting enemy obstacles, and second, those used by the engineers in assault.

In the first category is the "scissors" type bridge that is carried folded on top of a Valentine tank, a mechanism operating from inside the tank unfolds the bridge and lays it across the gap. The Churchill bridge-layer is also used by the R.A.C. It consists of a thirty-foot span steel trackway mounted on a Churchill hull, that can be raised by a mechanical pivot arm, carried forward, and lowered in front of the tank. The bridge can be laid, and the tank withdrawn to make way for other vehicles to cross, in a matter of seconds. The whole operation is performed from within the protection of the Churchill, no outside assistance being necessary.

For assault purposes the engineers use a bridge, mounted on an engineer tank, that consists of two trackways made up of hornbeam sections of a small girder bridge. The trackways are held to the tank by steel wire ropes which, when released by the tank crew from inside, lowers the bridge across the gap in one piece.

The engineers also use a specially prepared version of the Churchill tank as a makeshift span for bridging wider gaps. For this role the tank's turret is replaced by trackways on top that are supplemented by additional trackways that project before and behind and are hinged so that they are raised off the ground. The Churchill is driven directly into the gap, the ramps are lowered and the vehicles are enabled to pass over it.

Tank bridges of all these kinds have been used with great success in north west Europe, Italy and Burma. They may be carried in a landing craft in order that tanks may deploy and fight as quickly as possible after landing. They permit operation with almost surprise speed and good results without which enormous casualties might have resulted to engineer personnel.

Tractors For Europe

Will Help Liberated Countries To Start Raising Food Supply

To help liberated European countries start raising their own food supply, the United Nations relief and Rehabilitation Administration announced at Washington that it will send 14,500 tractors to be used in planting this fall's crops.

UNRRA estimates the tractors will enable cultivation of 2,900,000 acres or enough to produce under normal conditions about 1,500,000 tons of cereals.

Director Herbert H. Lehman said 13,000 of the tractors will be obtained in the United States.

Countries receiving the tractors fall into two classes: those who are able to pay for them and those who are receiving UNRRA financial assistance. They are distributed as follows:

France 3,798 Italy 810 Netherlands 530 Norway 330; Belgium 150 Denmark 70
Xavier, Poland 3,326; Yugoslavia 2,500 Czechoslovakia 1,500; Greece 1,261; Albania 25.

No Nationality

Hawaiian Population Is Mostly Made Up Of Many Races

The present-day Hawaiian people are a composite of many races, the most important of which is the Hawaiian.

The inroads of Asiatic immigration have changed the physiognomy of the islands to such an extent that it would probably be hazardous to speak even of a Hawaiian nationality.

There is no common tongue, except in so far as everybody can speak English, and certainly no common cultural tradition. As the crossroads of the Pacific, the Hawaiian islands partake of a multiplicity of creeds—Christian Science Monitor.

BUILD MORE SHIPS

In the drive to rebuild Britain's depleted merchant navy, eight vessels, totalling 37,400 gross tons, were launched from Clyde shipyards during May.

Easy Breathing

New Process

Spectrum Coated Metal Said To Be Equal To Silver Plating

Spoons and forks, plated according to a new British process, retain a lustre equal to silver without any treatment beyond washing in soap and water. This process, called spectrum-coating has been developed by scientists. It can be applied simply and directly to any metal, giving exactly the appearance of silver. Tests have shown, however, that spectrum-coated metal, which has the same reflectivity as silver articles when new, registers 400 per cent. higher reflectivity in one month's exposure under identical conditions. Acids such as lemon juice and beer, have absolutely no effect on its silver lustre. Other advantages of the coating are that it does not scratch or flake, even when articles are severely bent or twisted. It is so tough that an average coating of the two-thousandths of an inch is adequate to give excellent protection.

Spectrum plating is already being used in the United Kingdom on a wide range of products including all types of household goods and fittings.

Newspaper Policy

Maintenance Of Reader Confidence Is Of Most Importance

It is strange, and not very flattering to the human intellect, what fairy tales gain currency and are accepted. One of these fairy tales has it that advertisers dominate newspaper policy. Advertising is important to newspapers, but not nearly so important as many people think. The maintenance of reader confidence is much more important both to the newspaper itself and to its advertisers, and reader confidence would soon be forfeited if the idea got abroad that the newspaper allowed any ulterior influence to sway the opinions it expresses. — Vancouver Province.

Junior Miss Dirndl

By ANNE ADAMS

To your home-coming here you'll look like a diva in a wing-sleeved dirndl. Romantic drapery, neckline, swishy flared skirt. Pattern 4633 is easy sewing for beginners.

Pattern 4633 comes in Junior Miss sizes 11, 13, 15, 17, Size 13, frock, 2 1/2 yards 39-inch material. Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg-Newspaper Union, 175 McDermot Ave., E., Winnipeg, Man. — Because of the slowness of the mails delivery of our patterns may take a few days longer than usual.

Butter was made by some tribes in Tartary by filling a skin bag with milk, tying it to a saddle and dragging it over rough ground by way of churning.

NOTES AND COMMENTS

Plane Feeder System

During the past few weeks interest has arisen in the Kootenays for the establishment of a feeder system that would give Kootenay points air service to major Trans Canada Airline terminals such as Lethbridge.

Technical men have already visited the Kootenays to gather information and a meeting of the Kootenay's Associated Boards of Trade has been held to further discuss and promote the feeder system plan. While their efforts may not be crowned by success in the immediate future there is little doubt that ultimately the Kootenays will be given plane service.

Coleman should be vitally interested in what transpires in the Kootenays. We, too, have an airfield located in a large industrial area. We, too, desire a feeder system that will connect us to the Trans Canada air terminal at Lethbridge. Surely we cannot sit idly by and watch a feeder system that connects the Kootenays with Lethbridge fly over our own field. Cannot we ask to participate in the discussions now taking place at Cranbrook and Kimberley?

Holiday Time

It would appear next to impossible to get ambitious these hot summer days. Many have already left on vacations, while many others are preparing to leave or "talking up" their holidays which are planned to take place within the next month. That holiday feeling is in the air and no matter where one goes the topic of conversation usually starts with "when are you going on holidays?"

Already Coleman has that holiday spirit. The majority of organizations have closed down for the summer recess. Even our old news stand-by the council has gone on record to hold one meeting per month during the summer months. The main street is quiet on week days and community activity is held down to a minimum.

Banks Get New Job

Possibly by July 20, cheques for the first month's payment under the Family Allowance Act will start reaching their destinations.

Official estimate is that 1,466,000 individual cheques will be issued monthly, which in a year will aggregate approximately \$250,000,000.00. These cheques will practically all be taken to the banks for encashment.

During the course of the war the work in branch banks has been very greatly increased at a time when some 8,600 experienced staff members have enlisted in the Armed Forces and when new staff has had to be broken in. The encashment of cheques for members of the Armed Forces and for payment of their dependents' allowances, and for workers in government plants and other war industries has, of course, reached great proportions. The number of cheques going through banks has been multiplied by millions.

Wartime services also taken on by the banks include: the servicing of Victory Loans; the selling, delivering and safe-keeping of bonds and the cashing of coupons; also the selling and safe-keeping of War Savings Certificates; the making out and handling of forms required under Foreign Exchange Control; ration coupon banking; and many others.

In addition to all of this, the banks now enter willingly on the task arising from family allowances.

To help the banks cash these cheques, recipients are asked to remember four simple requirements:

1. The need for proper identification at the bank;
2. The need to make sure that cheque is correctly endorsed;
3. The need to guard against losing cheque after endorsing and before cashing it;
4. The importance of going to the bank during the morning hours if possible.

Money Down The Drain Pipe

Year after year this piece of so-called hard-surfaced highway between Pincher Creek and Macleod has certain sections plowed up and re-surfaced. To us it is just like pouring money down a drain pipe. Each year the same methods appear to be used in repairing, despite the fact that evidence has shown that in a matter of another year or two it will be in as bad condition as ever.

Motorists are not blind to this waste of public funds, especially the motorists in the Pass who have been agitating unsuccessfully for years to have the Pincher Creek-BC boundary road hard-surfaced and always are given the same excuse—lack of funds, men and material.

The Macleod-Lethbridge highway appears to be holding up nicely and we give credit to the drainage system along this stretch of highway. The Pincher-Macleod stretch has just been laid on top of the prairie with little or no consideration for drainage. Possibly better drainage would be the key to keeping this highway from deteriorating so quickly.

NSS REGULATIONS RE

WOMEN WORKERS

Relaxation of National Selective Service civilian regulations in regard to women, announced several days ago, is working out satisfactorily, according to a statement issued by Hon. Humphrey Mitchell, minister of labor. At the same time the labour minister stated that the local employment offices in many parts of the country still have a large number of employment vacancies for suitable women applicants. "We are still faced with these labor shortages," the minister said, "and the employment service is still trying to find women to fill them."

The minister added that instructions have been issued to the local employment offices to not insist upon a woman appearing personally at the office after securing a job which she has located for herself. While it is required that the employment office receive a report on any woman engaged who has not previously secured a permit from the office, the report may be made either by the new employer or by the woman herself by personal call or by telephone.

The minister said that it appeared that there was some misunderstanding in regard to the exact significance of the relaxation of selective service regulations in relation to women. For instance, a wartime order-in-council still in force prohibits the activities of private fee-charging employment agencies. Fee-charging agencies for either men or women are also prohibited by provincial legislation in most of the provinces.

Another point that has come up is in connection with the coverage of women workers under the unemployment insurance. Selective service regulations have no bearing on unemployment insurance, so there has been no change whatever in the application of unemployment insurance to any class of women who are in insurable employment.

WAR DOLLARS

DO THREE ESSENTIAL JOBS:

1. HELP CARRY ON THE WAR—

Every possible dollar will be needed to bring the war to a successful conclusion. THEREFORE, every dollar you lend enables you to play a vital part in the great fight for freedom.

2. CURB WASTEFUL SPENDING—

To retard spiralling prices and rises in the cost of living, income must be diverted from unwise purchases and made available for war use. WAR SAVINGS mean money put aside to aid essential war production.

3. PROVIDE A NEST EGG—

Following every major war, there is a period of economic re-adjustment. The man who has taken his share of WAR SAVINGS will find this money very useful during this transition period.

Do Not Undermine Your Future Security!

Cashing your Victory Bonds to-day when there is no real need for doing so is only undermining your future security.

Canada is still at War in the Pacific. She still requires your money to help her war effort. By cashing Victory Bonds without a legitimate excuse is sabotaging the country's war effort.

Guarantee Canada's security by protecting your own.

HOLD ON TO YOUR VICTORY BONDS

ST PAUL'S UNITED CHURCH

G. A. Kettys, B.A., Pastor
Sunday, July 15:
Morning Service at 11 a.m.
There will be no Sunday school until further notice.

The evening service has been discontinued until further notice.

ST. ALBAN'S CHURCH

Rev. W. E. Brown, Rector
Daily offices:
Mattins 9 a.m. Evensong 7.30 p.m.
The seventh Sunday after Trinity:
Evensong 7 p.m.

The Lord Bishop of the Diocese in the presence of a large congregation held a most impressive Confirmation service on Sunday past. The Bishop congratulated the congregation on the improvements made to the church, and especially the town council on the improvements made to the town in the splendid concrete steps going up the hill. The foreman and workmen are to be congratulated.

Altar flowers July 8 given by Mrs. E. Kennedy and Mrs. W. H. Garner; July 1 given by Mrs. E. W. Beart and Mrs. Kennedy in memory of Ernest W. Beart.

In Memoriam

JOHNSON—In Loving Memory of our dear husband and father, Karl Johnson, who passed away on July 14, 1944.

I cannot say, and I will not say
That he is dead—he is just away!
With a cheery smile, and a wave
Of the hand,
He wandered into an unknown
land,
And left us dreaming how very
fair
It needs must be, since he lingers
there.
And you—O you, who the wildest
yearn
For the old-time step and the glad
return—
Think of him faring on, as dear
In the love of There as the love of
here;
Think of him still as the same,
I say:
He is not dead—he is just away!
Ever remembered by his wife,
sons and daughters.

JOHNSON—In Loving Memory of our dear dad and granddad, Karl Johnson, who passed away July 14, 1944.

God saw the road was getting rough,
And the hills were hard to climb,
So He closed your weary eyelids,
And whispered "Peace be thine."
Ever remembered by Edward,
Rita, Anola, Jesse and Lynnwood,
of Kaslo, B.C.

Board Of Public

(Continued from Page 1)

The simple fact is that the distributor and the producers who gave evidence are living on their depreciation. There must inevitably be an end to that situation. Mr. De Groot's position is favorable when compared with that of Oliver, which is due to the fact that he was able to make a favorable deal for hay in the Pincher Creek area and trucked it to his own farm. Mr. Oliver, on the other hand, purchased hay at prices which varied from \$24.80 to \$30.00 per ton and in addition he paid from \$26.50 to \$27.50 per ton for mill feed. He produced invoices in corroboration of these figures.

The Board was impressed with the sincerity and the truthfulness of all the witnesses and accepts the statements made by them without reservation. The Board is of the opinion that a serious situation exists in the Crows' Nest Pass. The applicant company cannot be expected to continue furnishing milk to its customers and to incur substantial losses each year in doing so.

Apart altogether from the fact that proper wages are not being paid either to the plant manager or the business manager, one of two things must happen: the first is that they must be given a price for milk which will enable them to operate without loss, or they must discontinue the purchase of milk from Lethbridge, and in that case will be obliged to ration the milk which is available in the Crows' Nest Pass. The latter, to the Board's mind, is an impossible alternative.

The Board is of the opinion that if the producers had some inducement to do so they would make an effort to increase their own production and thereby eliminate the necessity of securing supplies from Lethbridge. Under present conditions there is no inducement for them to improve the milk situation.

After careful consideration of all the evidence adduced and the exhibits submitted, coupled with the information disclosed in the investigation conducted by the Board on its own account, it is of the opinion that the price of milk in the Crows' Nest Pass area should be increased by the sum of 2¢ per quart, 1¢ of which should go to the applicant distributor and 1¢ to the producers shipping to the plant. The Board has already referred to the comparable conditions existing in this area and the Cadomin, Mountain Park and Nordegg areas where the price is 17¢ per quart. It is true that these three districts have disadvantages which do not apply to the Crows' Nest Pass area, but the disadvantages of labor shortage and feed difficulties is common to all four areas. The whole situation must be carefully reviewed next Spring to ascertain to what extent production has increased in the area so that the price structure may be revised. The Board will therefore

recommend to The Wartime Prices and Trade Board that the increases above mentioned be granted, but no price order will issue until the decision of The Wartime Prices and Trade Board is made known.

POLYMERIZED

PURITY "99" MIRACLE
GASOLINES

MEANS . . .

ECONOMY

"Polymerization" of Purity and Miracle "99" gasolines means extra mileage — as much as 12% by actual test—because the uniform molecules produced by the process give smoother, cooler operation.

PERFORMANCE

"Polymerized" gasoline achieves higher octane standards with a lower lead content. Your motor operates closer to its rated capacity at lower temperatures, with a notable improvement in all-round performance.

LONGER MOTOR LIFE

Marked improvement in carburetion given by "polymerized" gasoline, with cooler motor operation mean longer life for your motor. "Polymerized" gasoline reduces the danger of burned valves.

Change to Purity or Miracle "99" Gasoline . . . They are "Polymerized"

It's Cooling "SALADA" ICED TEA The Extraordinary Soldier

AFTER FIVE YEARS OF WAR, Canadian soldiers who have served overseas, many of them since the winter of 1939-40, are returning to their homes and large numbers of them are now resuming their civilian occupations. There is no lack of warmth in the welcome that is being extended to the returning service men, and conditions relating to their discharge from the forces are much more favourable than those which obtained at the end of the First World War. It is unnecessary at this time to remind Canadians of their debt of gratitude to the returned men, but it is important that we resolve to remember it in the years to come, when uniforms are no longer in evidence and the war is a part of the past. We again enjoy the comfort and security of life in time of peace, we must not forget that these things have been preserved for us by the bravery and sacrifice of those who went to war.

Make The Best Fighting Men

A British writer in an article on the "ordinary" soldier recalls that the Duke of Wellington, when asked just before a battle what he believed his chances were, pointed to a British foot soldier and said: "It all depends on this article." He goes on to speak of the ordinary soldier of the British army, "and his brothers from the British Dominions," and he observes that "for all their good humour they make the best and toughest military material in the world." History shows that the Germans have on more than one occasion failed to realize that fact, and that they have also underestimated the ability of the British people to change rapidly from peace to wartime conditions. It is pointed out that in 1939 Britain could not put twenty divisions into the field, but that when full mobilization was accomplished there were over 3,000,000 men in the British forces. In Canada, and the other Dominions, civilians were likewise speedily mobilized and trained into highly efficient fighting forces.

Responsible For Many Successes

The toughness and courage of the ordinary soldier were largely responsible for the many defeats suffered by the German and Italian armies in Europe and Africa. It is recalled that in Norway in 1940 a British force of only 24,000, in a defensive action, killed 37,000 Germans, suffering only 1,000 casualties itself. During the campaign in North Africa in a two months' period, a force of less than 50,000 men, commanded by General Wavell, destroyed the flower of the Fascist army, the prisoners alone numbering 133,000. During the campaign in Europe, the courage and tenacity of the ordinary soldier fighting from the beaches of Normandy to the far side of the Rhine, figured largely in the successes which led up to final victory in that theatre of war. The British writer concludes with the observation that the "ordinary" soldier from Britain and the Dominions has come to be regarded as "extraordinary" by the enemy, and as such he should be remembered in his own country as well.

Liner In Good Shape

Inspection Showed Very Few Scars On The Queen Mary

Five years of war service and the carrying of hundreds of thousands of rough and ready fighting men to war have left few scars on the liner Queen Mary, an inspection trip of the huge vessel showed.

The Queen Mary which arrived in New York recently with 14,500 American troops from Europe, was opened for inspection by the press for the first time since she slipped from her North River berth March 20, 1941, into the obscurity of censorship.

The Queen Mary was outfitted for war at Sydney, Australia, where she arrived April 17, 1941. Many luxurious fittings were removed, swimming pools turned to other uses, every available inch of space made into sleeping quarters.

But left intact were the great lounges, ponded in rare woods collected from every part of the British Empire. The valuable woods remain unscathed without the initial of an enthusiastic soldier. Panned passageways and other sections of the ship also are unmarked.

The Queen Mary's hull told a different story, however. There the troops gave full vent to their whims. Hardly an inch of rail remains without initials.

Youth Training

Estimated 500,000 Will Need Training In Vocational Schools

A report submitted by the Education Committee of the Canadian Youth Commission estimated that in the demobilization period 500,000 persons will require training or re-training in vocational skills. The report urged the extension of vocational guidance and vocational education throughout secondary schools and continuation of the Dominion-Provincial youth training program.

The so-called steam that billows forth in clouds from volcanoes is not steam at all, but a form of dry gas.

Great Help To Soldiers

General Patton Says Tanks Just Armored And Armed Infantry

Peter Edson, NEA correspondent, tells this story about a U.S. General's appearance at a press conference in Washington:

Tanks, Patton said, were nothing but armored and armed infantry. In the infantry you had the squad and in the tanks you had the crew. The tanks enabled the soldiers to arrive at the scene of battle less fatigued, and they enabled the soldiers to carry two blankets instead of one. Also, if the soldier got his feet wet, he could dry his shoes over the exhaust pipe.

The General said he thought there was a sort of race instinct that made people afraid of tanks. They used to be afraid of saber-toothed tigers and dinosaurs and things like that, and so now when they see a tank coming they think, "My goodness. Here comes a saber-toothed tiger," and they run instinctively.

But tanks, he said, enabled armies to break through enemy lines to gain an advantage and keep the enemy running. If you're a prize fighter you know that when you get a man on his heels you can lick him. If he can get back on his toes, or if he can put lemon juice in his mouth and ice on his head between rounds, it's a lot harder. But if you keep him on his heels he just naturally keeps on going over backward further and further until you bury him.

Secretary Stimson had introduced Patton as a cavalryman. The General said that if he had had a little cavalry in Tunisia and Italy, the bag of prisoners would have been a lot bigger. He figured it like this: If a man can go N number of miles an hour on foot, he can go N-plus-one miles if he's retreating. But if you go after him at N-plus-three miles an hour in horseback, you just naturally overtake a lot more.

Patton said he did have a little cavalry in Africa at that. Nine hundred men mounted on jackasses and bulls and burros and such things. But what amazed the General was how ignorant most Americans are about animals. They can all drive an automobile but they can't saddle a horse to save their lives.

A Varying Quantity

Number of Pounds in Legal Bushel Depends On Commodity

The bushel is a varying quantity. A bushel of wheat weighs almost twice as much as a bushel of oats, a fact that is quite generally known. There are, however, a large number of varying weights of the bushel, many of which may not be known to great numbers of people.

In contracts for the sale and delivery of the following commodities the legal weights (in pounds) per bushel are fixed as follows:

Alfalfa seed, 60; barley, 48; beans, 60; bituminous coal, 70; blue grass seed, 18; broom grass seed, 14; buckwheat, 48; clover seed, 49; flax seed, 56; hemp seed, 44; Indian corn, 56; lime, 70; malt, 36; oats, 34; peas, 60; potatoes, 60; rye, 56; soy beans, 60; timothy seed, 48; wheat, 60.—Fort William Times-Journal.

JUST PRESS BUTTON

Danish traitors sentenced to death in coming trials may be executed by a mechanical shooting apparatus which fires a volley by the mere touch of a button. The justice department is testing the machine.

MACDONALD'S BRIER

Canada's Standard Smoke

LADY ASTOR ACQUIRES A DAUGHTER—The first big society wedding since the war ended in Europe took place in London, Eng., when Lieut. the Hon. William Waldorf Astor, M.P., and eldest son of Viscount and Viscountess Astor, took as his bride the former Hon. Sarah K. E. Norton, daughter of Lord Granville. The bride and groom were pictured leaving the church, radiant with happiness.

Price Control And Rationing Information

Q. I am expecting visitors from the United States for the summer months. Will they be able to obtain temporary ration cards?

A. Visitors coming into Canada for five days or longer can obtain temporary ration cards on application to a local ration board.

Q. My dry cleaner will call at my home on certain days only yet I understand that restrictions on deliveries and pickups have been lifted. Is this not so?

A. Yes. Restrictions limiting vehicle and retail deliveries, pickups and deliveries by handtrucks and dry cleaners have been lifted, but a merchant is free to continue to limit these services if he wishes.

Q. Recently I bought a cotton housecoat and on the first washing it shrank so much that I haven't been able to wear it again. How should I go about reporting a case of this kind?

A. First of all, take the dress back to the store where you bought it. If the retailer will not make an adjustment on the dress, forward the dress, along with the sales slip and label which was attached to the dress, to the Wartime Prices and Trade Board office.

Q. Is it necessary to state the selling price of an automobile when placing an advertisement in the paper?

A. Yes, you must mention the price that you are asking for your car. You must also mention the make, model, body type, model year, serial number, options and accessories including any spare tire and tube, and your name and address.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your selling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

Heart Failure

Said To Be Due To Speed Of Modern Living

Science is convinced that the increasing incidence of heart failure is due almost entirely to the inordinate speed of modern living, coupled with its complexities, which make for worry and mental and nervous strain. It seems obvious, therefore, that we have to slow down and live simpler lives.

This is not easy of accomplishment. It requires a radical change in our whole social and business structure. It is not entirely a medical problem, but touches all phases of life, commerce, industry, government and sociology. It merits the closest study by all in positions of authority and influence, but a good start can be made if individuals will seek the best medical advice and then try to adjust themselves and their activities to it.

Windsor Star.

MECHANICAL MEMORY

Dr. Vannevar Bush of the office of scientific research and development at Boston, predicts that men and women soon will do their memorizing by machine instead of in their heads. Writing in the current Atlantic Monthly, Dr. Bush called this device of the future a Memex. He defined it as a device in which an individual stores all his books, records and communications.

ON DISTANT PLANETS

Dr. Henry Norris Russell, Princeton astronomer, said it is reasonable to suppose there is life, like that on earth, on some distant parts of the vast universe outside the solar system. He based this he said, on discoveries made since the war started.

HOW YOU CAN GET QUICK RELIEF FROM SORE, PAINFUL PILES

Most people seem to think the only way to get relief from their sore, painful piles is by local treatment. Local treatment may give you some relief, but it does not cure the cause of your piles.

NOTE: This generous offer is backed by a reliable firm doing business in Canada for a good many years. Hem-Rol must help your pile condition quickly, easily and pleasantly or the money is yours. Try it today.

Here a CWAC There a CWAC

MEET A CWAC—

"Just around the corner from 'Ike'," said Sgt. Josephine Pederson, Prince Albert, when asked where she was billeted during her overseas stay. "We didn't meet him but we did talk to his driver nearly every day and he told us a lot about the General." Stationed in London with Canadian Military Headquarters, she had plenty of opportunity to see the sights. Tower of London, Madame Tussauds Wax Works and Kew in "lilac time." On her longer leaves she visited Wales and different parts of southern England. "It was our good fortune," Sgt. Pederson goes on to say, "to be among those sent on a short course to Edinburgh University. We were treated royally, had tea with the Lord Mayor, and attended the graduation of the Medical School, among other things." Preceding Josephine overseas was a certain F.L.I. Pederson whom she had met in Prince Albert. She married him in December, 1943, at St. Martin's in the Field, London. Sgt. Pederson joined the C.W.A.C. in December of 1941. Since her return from overseas she has been engaged as Sergeant Caterer in the CWAC Sergeants Mess, Regina, "but I'm looking forward to settling down in a home of my own," she states.

Heart Failure

Said To Be Due To Speed Of Modern Living

Science is convinced that the increasing incidence of heart failure is due almost entirely to the inordinate speed of modern living, coupled with its complexities, which make for worry and mental and nervous strain. It seems obvious, therefore, that we have to slow down and live simpler lives.

Writing in the current Atlantic Monthly, Dr. Bush called this device of the future a Memex. He defined it as a device in which an individual stores all his books, records and communications.

ON DISTANT PLANETS

Dr. Henry Norris Russell, Princeton astronomer, said it is reasonable to suppose there is life, like that on earth, on some distant parts of the vast universe outside the solar system. He based this he said, on discoveries made since the war started.

Cooling Milk

Water Absorbs Heat Much More Quickly Than Air

If a can of warm milk is placed in a refrigerated room where the air temperature is at freezing point, it will take 12 hours before the temperature of the milk has fallen to 50 degrees F. That is because air absorbs heat very slowly. Water absorbs heat more quickly than air. Because in cooling milk with water, the larger the volume of water and the lower its temperature, the more quickly the milk will be cooled. Cooling is more rapid when either the milk or the water or both are kept in motion. The value of stirring the milk is a matter of commonplace knowledge on the farm, but the idea that equally good results may be obtained by stirring the water is not so well known. In stirring milk, however, there is a risk of adding bacteria if the stirring rods are not thoroughly washed and sterilized. The better method, therefore, is to stir the water by means of a propeller driven by a small windmill or by an electric motor.

GEMS OF THOUGHT

RIGHT PRIVILEGS

The force of an ideal is greater than the ideal of force, Josephus Daniels.

From lack of moral strength empires fall. Right alone is irresistible, permanent, eternal.—Mary Baker Eddy.

The ultimate notion of right is that which tends to the universal good; and when one's acting in a certain manner has this tendency he has a right thus to act. Francis Hutcheson.

If mankind had wishes for what is right they might have had it long ago. William Hazlitt.

God is able to meet the need of all and fulfill every desire; it is just a question of your hunger for righteousness.—R. A. Butler.

Then pealed the bells more loud and deep:

"God is not dead, nor doth He sleep!

The Wrong shall fall,

The Right prevail,

With peace on earth, good-will to men!"—Longfellow.

LARGE NUMBERS OF CANADIAN ARMED FORCES ARE RETURNING TO CANADA ON TWO LINERS

LONDON. — A force of 16,350 Canadians is bound for Canada in the liners Queen Mary and Ile de France.

The Queen Mary left Gourock, Scotland, Friday night, 24 hours after a group of Canadian soldiers had smashed store windows in Aldershot, mainly due to resentment at delay in repatriation but a Canadian army spokesman said the movement was routine and not a result of the demonstrations at Aldershot. The Ile de France sailed Saturday.

The Queen Mary also carried about 8,000 Americans.

Some 6,650 Canadian army other ranks were included in the Queen Mary's total passenger list of 15,000 while the Ile de France carried 9,700 Canadians, including more than 5,000 R.C.A.F. personnel, 4,600 from the army and a sprinkling of Navy, C.W.A.C. members, Women's Royal Naval Service personnel and nursing sisters.

The two ships carried both repatriates and volunteers for the Canadian Far East force.

Among the troops were "many" who took part in the Aldershot demonstrations, a Canadian army spokesman said, and one Canadian soldier, in fact was on the ship ready to sail for home when he was taken off to face the Aldershot court of inquiry as an alleged ringleader in the window smashing incidents.

The spokesman emphasized, however, the movement was not a result of the demonstrations but a "routine movement the same as those which have been going on and will be going on for some time."

OCEAN TRAVEL

Passenger Vessels In Competition With Trans-Atlantic Air Routes

NEW YORK. British passenger vessels will hold their own in post-war competition with trans-Atlantic air support organizations. Capt. C. M. Ford, R.D., R.N.R., master of the Queen Elizabeth, predicted.

"We'll do our bit and we intend to have our bit," he told a press conference aboard the 1,031-foot veteran of scores of wartime trips across the Atlantic and Pacific, during which she carried some 650,000 British, American, Canadian and Australian military and naval personnel to and from the European and Pacific theatres of war.

Discussing the relative speed of air and ocean travel between North America and Europe, Capt. Ford said:

"The competition will not be too severe. After all, nowadays an air passenger flies to Newfoundland, hangs around there about two days in the ice, arrives in Prestwick, Scotland, and then takes a train to London. In the meantime, we leave New York, arrive in England in 4½ days or less and as often as not are there ahead of the airplane."

JAP CASUALTIES

4,900,000 Japanese Killed, Injured Or Rendered Homeless

SAN FRANCISCO. Tokyo radio acknowledged that 4,900,000 Japanese have been killed, injured or rendered homeless in five large homeland cities as the result of American aerial blows up to May 31.

The broadcast, monitored by the American Broadcasting Company, said 1,135,000 homes were destroyed in the attacks.

Text of the broadcast: An authoritative estimate of damages done to five large Japanese cities from enemy air raids up to May 31 was given as follows:

In Tokyo, houses burned down totalled 767,000 and those rendered homeless 3,100,000.

In Osaka, 120,000 houses burned down and 510,000 people were rendered homeless.

In Yokohama 132,000 houses were destroyed and 650,000 people were made homeless.

In Nagoya 96,000 houses and 580,000 people affected.

In Kobe, 70,000 houses and 280,000 people were counted as destroyed or otherwise victimized.

TO BE REBUILT

DOVER, England.—Dover hospital is to be rebuilt as a memorial to those who fell in the Battle of Britain with an archway bearing the names of the airmen who were killed. There will also be a tower beacon shining up into the skies and over the straits where the main battles were fought.

Buy War Savings Stamps regularly.

NEW LEAVE CENTRE

Will Serve All Personnel Under 1st Canadian Army Command

AMSTERDAM. A new leave centre for Canadians and all other troops under 1st Canadian Army command is rapidly taking shape here under Lt. Col. George Weir, of Calgary and a large staff of army personnel. The centre, which opened July 1, will receive 1,500 troops daily, for three-day visits. The administrative offices will be in the huge stadium built for the 1928 Olympic games.

Service women come under the scheme and the set up will receive 45 women officers and 80 women other ranks daily.

Hotels, restaurants, theatres and even canal cruises have been requisitioned to handle the 4,500 odd service personnel in Amsterdam each day. One restaurant, renamed "Van-cuiver House", seats 1,200 at a time. There are five refreshment rooms with a combined capacity of 1,200 and "The Canada Club" in a hotel annex has a floor big enough for 800 dancing couples.

BACK FROM ACTION

H.M.S. Puncher Is Largest Warship Manned By Canadians

HALIFAX. Back from action in the Atlantic the North Sea and far northern waters with the British home fleet, the auxiliary aircraft carrier H.M.S. Puncher docked here for her first visit to a Canadian port in nearly a year.

Puncher, a baby flat top with an estimated full load displacement of 14,500 tons, is the largest warship manned by Canadians at the present time.

RAINS IN INDIA

Roads Under Water And Bridges Are Washed Out

NEW DELHI. The new Stilwell (Lado-Burma) road from India to China has had its first and hardest test of this monsoon and has come up muddy but unbowed. A six-day downpour dumped 23 inches of rain on the road and buried part of it under four feet of water. Two bridges were washed out, but engineers rushed repairs and after a brief delay traffic was resumed.

ILLEGAL FORTUNES

Made During War Have Been Seized By French Government

PARIS. The French government has seized 6,841 personal fortunes in a campaign against wealth made illegally during the war and more than \$280,000,000 will be confiscated by the end of 1945. Foreign Minister Rene Pleven told a cabinet meeting.

The consultative assembly also gave final approval to a national defence budget of \$500,000,000 for the third quarter of 1945.

SIGNS NEW "PEACE" CHARTER—Hon. W. L. MacKenzie King signs the United Nations peace charter for Canada, at San Francisco conference.

NEW RUSSIAN STAMPS

NEW YORK. The Soviet Tass news agency said that Russia had issued two postage stamps depicting against the Canadians in the three flags of the United States, Britain and the Soviet Union in color "in honor of the Anglo-American-Russian fighting alliance."

DRAIN FLOODED DISTRICTS

EINDHOVEN, Holland.—All areas flooded by the Germans in defence against the Canadians in the three western Holland provinces of Utrecht, North Holland and South Holland have been drained, Netherlands radio said.

A VERY GALLANT GENERAL—Gen. George S. Patton Jr., adopted son of the town of Hamilton, Mass., bends over and gallantly kisses the hand of Elsie Ostom, a young Girl Scout after Elsie had given Mrs. Patton, left, a bouquet of flowers at the held day tendered the 3rd Army commander.

RECONSTITUTED GOVERNMENT OF POLAND IS RECOGNIZED JOINTLY BY THE BIG POWERS

LONDON. Britain and the United States jointly recognized the reconstituted Warsaw government of Poland, cutting adrift the London regime with which they have dealt throughout the war. China also announced recognition.

In both London and Washington, however, it was emphasized in the announcement that establishment of the expanded Warsaw administration constituted only a "step" in fulfillment of the Yalta "Big Three" agreements.

The foreign office said the government had been advised by Edward Obuska-Morawski prime minister of the Polish provisional government of national unity in Warsaw, that the government was established June 26 and that it had recognized in the Crimea conference the Polish government.

The Crimea agreement of Prime Minister Churchill, President Roosevelt and Premier Stalin called for broadening the base of the Moscow-sponsored Warsaw group, to take in other democratic Polish elements and for "free and unfettered" elections to be held later. The Warsaw government has undertaken to arrange for

these as soon as possible.

Diplomatic comment here and in the United States has laid emphasis on the elections and the circumstances under which they are held as the finally important step in letting the Poles work out their own democratic course.

The foreign office said that "in full agreement with the United States government they (the government) conveyed to M. Obuska-Morawski their recognition of the Polish provisional government of national unity and have informed him of their readiness to establish diplomatic relations with it."

It added: "In doing so, they have recalled that the Crimea decisions on Poland include a provision that the Polish provisional government of national unity shall be pledged to the holding of free and unfettered elections as soon as possible on the basis of universal suffrage and secret ballot, in which all democratic and anti-Nazi parties shall have the right to take part and put forward candidates."

Pending appointment of a British ambassador to Warsaw, Robert A. Henkey will be charged d'affaires there.

MAY CONTINUE WARTIME FOOD BOARDS TO SPEED PRODUCTION AND TO DISTRIBUTE SUPPLIES

OTTAWA. Wartime food boards established in Canada and elsewhere to speed production and distribute

supplies eventually may be invited to continue their work indefinitely by an international conference of farm-ers in London this fall or next spring, it was learned here.

United Kingdom farm representatives recently in conference with the Canadian Federation of Agriculture, indicated their support of board operations being continued. This was in accord with a federation suggestion, set forth in a brief to the Dominion government, that there be international commodity councils to quarters at a place to be decided by representatives of the two nations in addition to the Commonwealth and the United States will attend the conference as observers with the prospect that they will have delegates at later meetings.

Authorities said that the efficiency of national food purchases and sales through boards probably would be an early subject of discussion at the conference with support of their continuance probable.

On an international basis these Canadian boards have been in consultation with similar organizations in other countries. They have been able to report the contribution Canada can make to the common food pool in particular commodities, and they have been able to advise also

on what the import requirements of the Dominion will be.

If the system of import and export food boards is continued, organized farmers believe they should have representation on committees and other working units, in an advisory capacity at least federation of agriculture officials said.

The London conference to be attended by the representatives of several million farmers in the British Commonwealth and the United States will plan the establishment of an international organization of farmers, with officers and a headquarters at a place to be decided by representatives of the two nations in addition to the Commonwealth and the United States will attend the conference as observers with the prospect that they will have delegates at later meetings.

Authorities said that the efficiency of national food purchases and sales through boards probably would be an early subject of discussion at the conference with support of their continuance probable.

TURNED BACK CLOCK

Revelstoke Re-Enacts Driving Of Last Spike In C.P.R. Railway

REVELSTOKE, B.C. Revelstoke turned back the clock 60 years to re-enact one of Canada's truly historic episodes, the completion of the trans-continental railway line which in effect, gave the young Dominion full nationhood.

On Nov. 7, 1885, Donald A. Smith (later Lord Strathcona) drove the last spike in the Canadian Pacific Railway line, completing the part of Confederation. The brief ceremony took place at Craigellachie, 28 miles west of here, with less than 50 witnesses.

On July 3 more than 500 Revelstoke citizens and visitors from all over the province saw the carefully staged re-enactment of the driving of the last spike with Wilfred Veith filling Lord Strathcona's roll.

OLD AGE PENSIONS

Agreement Is Made Between B.C. And Saskatchewan

VICTORIA. — Saskatchewan old age pensioners now living in B.C., will receive a cost of living bonus in old age pensions it has been announced by E. W. Griffin, assistant deputy provincial secretary in charge of social welfare.

The new agreement provides that B.C. will pay \$3 monthly to pensioners formerly resident of Saskatchewan, while the prairie province will pay former B.C. pensioners \$5.

Each province will collect from the other.

B.C. pays the same rate as Alberta to its aged pensioners to cover cost of living. Saskatchewan pays \$2 less per month. An agreement has been in effect between Alberta and B.C. for two years.

BATTERED BERLIN MAKES A SLOW COMEBACK—One of the latest photos to come out of Berlin showing how that former Nazi capital is slowly coming back from the dead. Still bearing many scars of the bombings and shelling it underwent, the city's rubble is being cleared away by its residents, many of whom have returned to the remains of their homes.

VITA=MIX

An association of the six necessary vitamins for the proper functioning of the human system. It has been experimentally proven that vitamins are more effective when grouped together. Vita-Mix is such a grouping, put up in powder form, offering a convenient and easy way of absorption.

Scientifically prepared for all age groups
